Shortcuts for Kile

Kate Part

Action Name	Shortcuts	Description
Add Byte Order Mark (BOM)		Enable/disable adding of byte order markers for UTF-8/UTF-16 encoded files while saving
Align		Use this to align the current line or block of text to its proper indent level.
Apply Word Wrap		Use this command to wrap all lines of the current document which are longer than the width of the current view, to fit into this view. This is a static word wrap, meaning it is not updated when the view is resized.
Automatic Spell Checking	Main: Ctrl+Shift+O	Enable/disable automatic spell checking
Backspace	Main: Backspace Alternate: Shift+Backspace	
Block Selection Mode	Main: Ctrl+Shift+B	This command allows switching between the normal (line based) selection mode and the block selection mode.
Capitalize	Main: Ctrl+Alt+U	Capitalize the selection, or the word under the cursor if no text is selected.
Change Dictionary...		Change the dictionary that is used for spell checking.
Clean Indentation		Use this to clean the indentation of a selected block of text (only tabs/only spaces). You can configure whether tabs should be honored and used or replaced with spaces, in the configuration dialog.
Clear All Bookmarks		Remove all bookmarks of the current document.
Clear Dictionary Ranges		Remove all the separate dictionary ranges that were set for spell checking.
Comment	Main: Ctrl+D	This command comments out the current line or a selected block of text. The characters for single/multiple line comments are defined within the language's highlighting.

Action Name	Shortcuts	Description
Copy	Main: Ctrl+C Alternate: Ctrl+Ins	Use this command to copy the currently selected text to the system clipboard.
Cut	Main: Ctrl+X Alternate: Shift+Del	Cut the selected text and move it to the clipboard
Delete Line	Main: Ctrl+K	
Delete Next Character	Main: Del	
Delete Word Left	Main: Ctrl+Backspace	
Delete Word Right	Main: Ctrl+Del	
Deselect	Main: Ctrl+Shift+A	If you have selected something within the current document, this will no longer be selected.
Duplicate Selected Lines Down	Main: Ctrl+Alt+Down	
Duplicate Selected Lines Up	Main: Ctrl+Alt+Up	
Dynamic Word Wrap	Main: F10	If this option is checked, the text lines will be wrapped at the view border on the screen.
Dynamic Word Wrap Indicators		Choose when the Dynamic Word Wrap Indicators should be displayed
Encoding		
End of Line		Choose which line endings should be used, when you save the document
Enlarge Font	Main: Ctrl++ Alternate: Ctrl+=	This increases the display font size.
Find Next	Main: F3	Look up the next occurrence of the search phrase.
Find Previous	Main: Shift+F3	Look up the previous occurrence of the search phrase.
Find Selected	Main: Ctrl+H	Finds next occurrence of selected text.
Find Selected Backwards	Main: Ctrl+Shift+H	Finds previous occurrence of selected text.
Find...	Main: Ctrl+F	Look up the first occurrence of a piece of text or regular expression.
Fold Current Node	Main: Ctrl+-	
Fold Multiline Comments		
Fold Nodes in Level 2		
Fold Nodes in Level 3		

Action Name	Shortcuts	Description
Fold Nodes in Level 4		
Fold Toplevel Nodes	Main: Ctrl+Shift+-	
Go to Line...	Main: Ctrl+G	This command opens a dialog and lets you choose a line that you want the cursor to move to.
Indent	Main: Ctrl+I	Use this to indent a selected block of text. You can configure whether tabs should be honored and used or replaced with spaces, in the configuration dialog.
Insert Smart Newline	Main: Shift+Return Alternate: Shift+Enter	Insert newline including leading characters of the current line which are not letters or numbers.
Insert Tab		
Invoke Code Completion	Main: Ctrl+Space	Manually invoke command completion, usually by using a shortcut bound to this action.
Join Lines	Main: Ctrl+J	
Lowercase	Main: Ctrl+Shift+U	Convert the selection to lowercase, or the character to the right of the cursor if no text is selected.
Move Cursor Left	Main: Left	
Move Cursor Right	Main: Right	
Move Lines Down	Main: Ctrl+Shift+Down	
Move Lines Up	Main: Ctrl+Shift+Up	
Move to Beginning of Document	Main: Ctrl+Home	
Move to Beginning of Line	Main: Home	
Move to Bottom of View	Main: Ctrl+PgDown	
Move to End of Document	Main: Ctrl+End	
Move to End of Line	Main: End	
Move to Matching Bracket	Main: Ctrl+6	
Move to Next Line	Main: Down	
Move to Previous Line	Main: Up	
Move to Top of View	Main: Ctrl+PgUp	
Move Word Left		

Action Name	Shortcuts	Description
	Main: Ctrl+Left	
Move Word Right	Main: Ctrl+Right	
Next Bookmark	Main: Alt+PgDown	Go to the next bookmark.
Overwrite Mode	Main: Ins	Choose whether you want the text you type to be inserted or to overwrite existing text.
Paste	Main: Ctrl+V Alternate: Shift+Ins	Paste previously copied or cut clipboard contents
Previous Bookmark	Main: Alt+PgUp	Go to the previous bookmark.
Print...	Main: Ctrl+P	Print the current document.
Read Only Mode		Lock/unlock the document for writing
Redo	Main: Ctrl+Shift+Z	Revert the most recent undo operation
Reload	Main: F5 Alternate: Refresh	Reload the current document from disk.
Replace...	Main: Ctrl+R	Look up a piece of text or regular expression and replace the result with some given text.
Reuse Word Above	Main: Ctrl+8	
Reuse Word Below	Main: Ctrl+9	
Save	Main: Ctrl+S	Save the current document
Save As...		Save the current document to disk, with a name of your choice.
Scroll Line Down	Main: Ctrl+Down	
Scroll Line Up	Main: Ctrl+Up	
Scroll Page Down	Main: PgDown	
Scroll Page Up	Main: PgUp	
Select All	Main: Ctrl+A	Select the entire text of the current document.
Select Character Left	Main: Shift+Left	
Select Character Right	Main: Shift+Right	
Select Page Down	Main: Shift+PgDown	
Select Page Up	Main: Shift+PgUp	
Select to Beginning of		

Action Name	Shortcuts	Description
Document	Main: Ctrl+Shift+Home	
Select to Beginning of Line	Main: Shift+Home	
Select to Bottom of View	Main: Ctrl+Shift+PgDown	
Select to End of Document	Main: Ctrl+Shift+End	
Select to End of Line	Main: Shift+End	
Select to Matching Bracket	Main: Ctrl+Shift+6	
Select to Next Line	Main: Shift+Down	
Select to Previous Line	Main: Shift+Up	
Select to Top of View	Main: Ctrl+Shift+PgUp	
Select Word Left	Main: Ctrl+Shift+Left	
Select Word Right	Main: Ctrl+Shift+Right	
Set Bookmark	Main: Ctrl+B	If a line has no bookmark then add one, otherwise remove it.
Shell Completion		
Show Folding Markers	Main: F9	You can choose if the codefolding marks should be shown, if codefolding is possible.
Show Icon Border	Main: F6	Show/hide the icon border. The icon border shows bookmark symbols, for instance.
Show Line Numbers	Main: F11	Show/hide the line numbers on the left hand side of the view.
Show Scrollbar Marks		Show/hide the marks on the vertical scrollbar. The marks show bookmarks, for instance.
Show Static Word Wrap Marker		Show/hide the Word Wrap Marker, a vertical line drawn at the word wrap column as defined in the editing properties
Show the JavaScript Console		Show/hide the JavaScript Console on the bottom of the view.
Shrink Font	Main: Ctrl+-	This decreases the display font size.
Sort Selected Text		
Spellcheck Selection...		Check spelling of the selected text
Spelling (from cursor)...		Check the document's spelling from the cursor and forward

Action Name	Shortcuts	Description
Spelling...		
Switch to Command Line	Main: F7	Show/hide the command line on the bottom of the view.
Toggle Comment		
Transpose Characters	Main: Ctrl+T	
Uncomment	Main: Ctrl+Shift+D	This command removes comments from the current line or a selected block of text. The characters for single/multiple line comments are defined within the language's highlighting.
Undo	Main: Ctrl+Z	Revert the most recent editing actions
Unfold All Nodes		
Unfold Current Node	Main: Ctrl++	
Unfold Nodes in Level 2		
Unfold Nodes in Level 3		
Unfold Nodes in Level 4		
Unfold Toplevel Nodes	Main: Ctrl+Shift++	
Unindent	Main: Ctrl+Shift+I	Use this to unindent a selected block of text.
Uppercase	Main: Ctrl+U	Convert the selection to uppercase, or the character to the right of the cursor if no text is selected.
VI Input Mode	Main: Meta+Ctrl+V	Activate/deactivate VI input mode
